Custom Tags

- TLD Format:

```
<tag>
    <name>…</name>
    <tag-class>…</tag-class>
    <body-content>…</body-content>
</tag>
```

Taglib Directive

- Used to locate TLD file in the JSP.
- E.g.

```
<%@taglib
  uri="<uri>" prefix="<prefix>"
%>
```
